California Proposition 65

Tuesday, July 17, 2018

The consumer protection and environmental laws of the State of California specifically through its Safe Drinking Water and Toxic Enforcement Act (California Health and Safety Code Section 25249.5) also known as Proposition 65, documents whether any of the raw materials contained in products which are sold in the State of California contain any substance known to the State of California to cause cancer or reproductive toxicity.

The purpose of Proposition 65 is to notify consumers that the product they are considering for purchase may expose them to chemicals that are known by the State of California to cause cancer, birth defects, or reproductive toxicity.

Kord King uses during its current manufacturing processes, components and raw materials that contain chemicals, including Antimony Trioxide, known to the State of California to cause cancer. Due to proprietary formulations the amounts present in the components and raw materials are unavailable. Kord King labels its products accordingly.
